

<b>Job Title:</b>	<b>Line Maintenance Controller</b>
<b>Department:</b>	<b>Technical</b>
<b>Location:</b>	<b>Dublin (Head Office)</b>
<b>Job Type:</b>	<b>Full Time Permanent</b>
<b>Recruitment Source:</b>	<b>Internal/External</b>

## **The Role**

Reporting to the Head of Maintenance Control and contributing to the Continuing Airworthiness team, the Line Maintenance Controller ensures continuity and provides enhanced technical support to Flight Crew, Operations Control and our Line Maintenance Stations throughout Europe.

The objective is to achieve the highest possible standard of technical reliability & performance for the Fleet & optimise aircraft availability to meet the flight schedule.

## **Duties & Responsibilities**

- Control, monitor and ensure that all scheduled and unscheduled maintenance tasks are carried out within their respective due dates and times.
- Manage all aspects of technical delays and AOGs, co-ordinate recovery operations by providing technical & logistical support. Arrange appropriate manpower & resources to return the aircraft to service in an efficient manner.
- Liaise with the Type Certificate Holder for the application of approved authorisations to repair and operate outside of the scope of allowable limitations.
- Control and manage aircraft systems redundancy when operating on MEL by ensuring prompt and appropriate defect repair action.
- Maintain effective interface with Operations Control, Flight Crew and Senior Technical Management to ensure that Technical Fleet status is always known.
- Ensure that all technical delay, cancellation & incident reports are filed in a timely manner on AMOS system.
- Maintain awareness of repetitive defects and arrange troubleshooting to help prevent duplication of manpower and spares resources.
- Maintain detailed knowledge of the Flight Schedule and reschedule maintenance opportunities as necessary due to disruption.
- Carry out any other duties as may be required by Senior Technical Management.

**CityJet is an equal opportunities employer**

### **Qualifications / Skills / Competencies**

- EASA Part 66 B1.1 or B2 license holder with an aircraft type rating.
- Minimum 6 years of experience in a busy aircraft Line Maintenance environment
- Ideal candidate will have Maintenance Control or Line Maintenance Supervisory experience or have maintained aircraft types that are in the Cityjet fleet.
- In-depth understanding of typical Company MMOE, MEL & department procedures
- Good working knowledge of AMOS software applications
- Good working knowledge of MS Office, aircraft maintenance data & related programs
- Excellent communication and interpersonal skills
- Flexible with the ability to work well under pressure
